1. INTRODUCTION OF SMEDA

The Small and Medium Enterprise Development Authority (SMEDA) was established with the objective to provide fresh impetus to the economy through the launch of an aggressive SME development strategy. Since its inception in October 1998, SMEDA had adopted a sectoral SME development approach. A few priority sectors were selected on the criterion of SME presence. In depth research was conducted and comprehensive development plans were formulated after identification of impediments and retardants. The all-encompassing sectoral development strategy involved overhauling of the regulatory environment by taking into consideration other important aspects including finance, marketing, technology and human resource development.

After successfully qualifying in the first phase of sector development SMEDA reorganized its operations in January 2001 with the task of SME development at a broader scale and enhanced outreach in terms of SMEDA's areas of operation. Currently, SMEDA along with sectoral focus offers a range of services to SMEs including over the counter support systems, exclusive business development facilities, training and development and information dissemination through a wide range of publications. SMEDA's activities can now be classified into the three following broad areas:

1. *Creating a Conducive Environment*; includes collaboration with policy makers to devise facilitating mechanisms for SMEs by removing regulatory impediments across numerous policy areas
2. *Cluster/Sector Development*; comprises formulation and implementation of projects for SME clusters/sectors in collaboration with industry/trade associations and chambers
3. *Enhancing Access to Business Development Services*; development and provision of services to meet the business management, strategic and operational requirements of SMEs.

SMEDA has so far successfully formulated strategies for sectors, including fruits and vegetables, marble and granite, gems and jewellery, marine fisheries, leather and footwear, textiles, surgical instruments, transport and dairy. Whereas the task of SME development at a broader scale still requires more coverage and enhanced reach in terms of SMEDA's areas of operation.

Along with the sectoral focus a broad spectrum of services are now being offered to the SMEs by SMEDA, which are driven by factors like enhanced interaction amongst the stakeholders, need based sectoral research, over the counter support systems, exclusive business development facilities, training and development for SMEs and information dissemination through wide range of publications.

2. ROLE OF SMEDA LEGAL SERVICES CELL

The Legal Services Cell (LSC) is a part of Business Development Division of SMEDA and plays a key role in providing an overall facilitation and support to SMEs. The LSC provides guidance based on field realities pertaining to SMEs in Pakistan and other parts of the world.

LSC believes that information dissemination among the SMEs on the existing regulatory environment is of paramount importance and it can play a pivotal role in their sustainable development.

In order to facilitate SMEs at the Micro Level LSC has developed user-friendly systems, which provide them detail description of the Laws, and Regulations including the process and steps required for compliance.

The purpose of this document is to provide SMEs either individuals or companies with information pertaining to Patent Registration. Entrepreneurs interested in enhancing their understanding about the procedures and rights can also use the document. For convenience of the readers sample of various forms, are also included.

3. DISCLAIMER

Information in this document is provided only for general information purpose and on an "as is" basis without any warranties of any kind. Use of this information is at the user's sole risk. SMEDA assumes no responsibility for the accuracy or completeness of this information and shall not be liable for any damages arising from its uses.

19. Opposition Proceedings	9
20. Duration of patent.	9
21. Rights conferred by patent	10
22. Loss or destruction of patent	10
23. Infringement of patent.	10
24. Annexures	11
25.	

4. What is patent?

Patent is an official document, recognized by law that confers a right or a title especially the sole right to make, use or sell some invention or process, hence protecting the said invention or process.

5. Patent laws applicable in Pakistan

- Patent Ordinance, 2000
- Patent Rules, 2003

6. What Invention is patentable?

Any invention is patentable, if it is

- New
- Involves an inventive step
- Is capable of industrial application

7. Cases in which Patent will not be Granted

- a) For an invention, the commercial exploitation of which would be injurious to public order, morality, environment or the protection of human, animal and plant life.
- b) For plants and animals other than micro-organisms
- c) For biological processes for the production of plants and animals.
- d) For diagnostic, therapeutic and surgical methods for the treatment of humans and animals.
- e) For a new and consequent use of a known product or process.
- f) For a change in the physical appearance of a chemical product where the chemical formula or process of manufacture remains the same. However, this clause shall not apply to an invention that does fulfill the criterion of patentability.

8. Who can apply for patent

An application for the grant of a patent may be submitted by any of the following persons:

1. The true and first inventor or inventors of the invention
2. Assignee or successors-in-interest of the true and first inventor or inventors
3. The legal representatives of any deceased person who was entitled to file an application immediately before his death.

NOTE: Every application shall be made in respect of one invention only.

However an application may also be made for an improvement or modification to the main invention. (Patent of Addition)

9. Where application is not made by the Inventor

Incase an application is not made by the inventor himself, it must be endorsed by him in the presence of two witnesses with a statement that the application may be made in his name.

10. Categories of application for the grant of patent.

Following are the different categories of applications along with required fees for the grant of patent:

Form	Application Description	Fees	Annexure no.
P-1	For patent when the true and first inventor is sole or joint applicant	Rs.2250	Annex.1
P-1A	For patent when the true and first inventor is not a party to the application	Rs.2250	Annex.2
P-1B	For patent of addition when the true and first inventor is sole or joint applicant	Rs.2250	Annex,3
P-1C	For patent of addition when the true and first inventor is not a party to the application	Rs.2250	Annex.4
P-2	Convention application when the true and first inventor is a sole or joint applicant	Rs.2250	Annex.5
P-2A	Convention application when the true and first inventor is not a party to the applicant	Rs.2250	Annex.6

Convention application is an application made in Pakistan within 12 months of an application made in a convention country. i.e. a member country of the WTO.

11. Specifications to accompany the application for patent

Every application, other than a convention application, must be accompanied by specifications of the invention which the applicant wants to be patented. These specifications must be either a provisional (**Form P-3, Annex.7**) or a complete specification (**Form P-3A, Annexure 8**). Where provisional specification has been filed with the application, a complete specification must be filed within **12** months of the filing of the application otherwise the application shall be considered abandoned.

12. Contents of Specifications

Every complete specification shall consist of:

1. A full description of the invention.
2. The method by which it is to be performed.
3. Must end with a claim defining the scope of the invention.
4. An abstract.(should not be more than 2 pages and must include the entire technical details relating to the invention)
5. Drawings may also be submitted along with the abstract either at the applicants will or the controller's request.

13. Examination of Application

- Every application that is submitted to the Controller, is referred to an examiner who shall assess the application in accordance with the following points:
 - a) Whether the invention is new.
 - b) Whether the invention involves an inventive step.
 - c) Whether the rules and requirements contained in the Patent Ordinance have been complied with.
- After an examination of the application by an examiner referred to by the Controller, the Controller may direct the applicant to:
 - a) Fulfill any rules of the Ordinance in case the application does not comply with them
 - b) Cause the application to be amended by the insertion of a reference to any other patent by way of notice to the public.

14. Withdrawal of application

The applicant has the right to withdraw the application by making a request to the Controller at any time. However:

- g) Where the invention relates to generically modified organisms, it will require clearance from the federal government.
- h) Where the invention relates to a pharmaceutical or agricultural chemical product and for availing related exclusive marketing rights, it shall be filed in the mail box provided for this purpose in the manner directed by the Controller.

- i) If the application is withdrawn before its acceptance and advertisement in the official gazette, the application and its accompanying specifications shall not be available for public inspection.

15. Acceptance of the application/specification

- On the acceptance of the application and specifications by the Controller he shall advertise them in the Official Gazette after which the documents will become available for public inspection.
- Within 30 days of the advertisement of the application, the applicant must forward a copy of the complete specification to certain institutions and organizations. (The 4th schedule, Patent Rules, 2003 Annex.9)

16. Effect of the acceptance of the application

Once the application has been accepted and till the date of the sealing of the patent, or the expiration of the time for sealing, the applicant shall be entitled to the rights and privileges as if the patent for the invention had been sealed on the date of the acceptance of the application.

17. Opposition to the grant of patent

Any person may file a notice of opposition with the controller to the grant of patent within 4 months of the advertisement. In case such a notice is filed the applicant may have to go through opposition proceedings

18. Grounds of opposition

A notice of opposition may be filed on the following grounds:

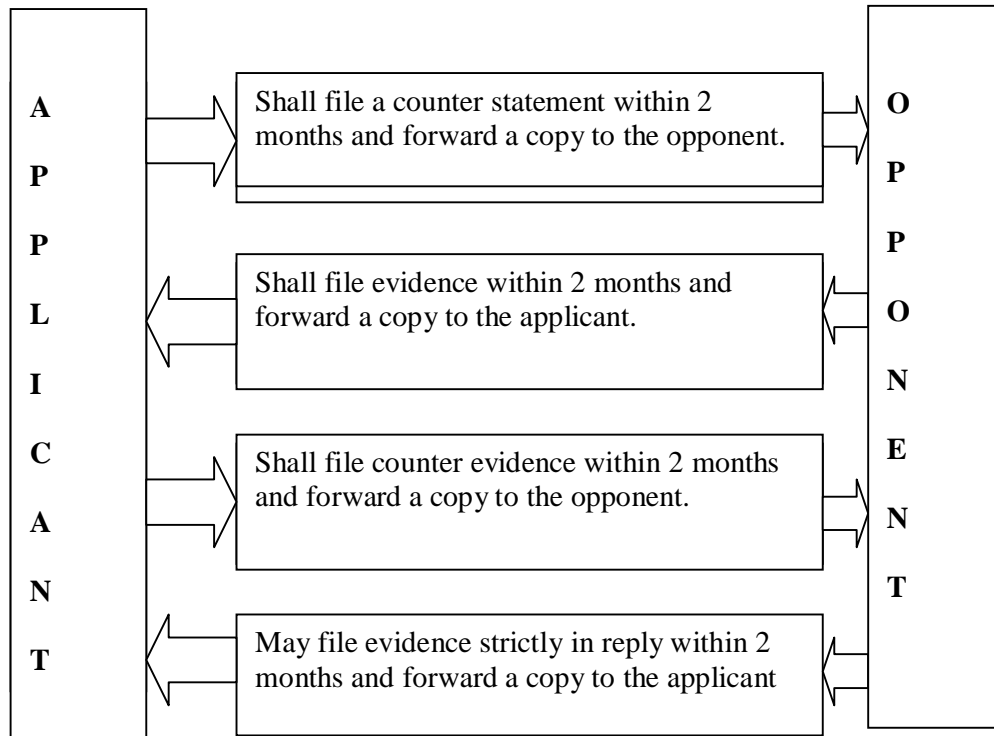

- The invention is not a patentable invention within the meaning of the Patents Ordinance, 2000
- The applicant obtained the invention sought to be patented from the person filing the notice of opposition or his assignee, agent or legal representative.
- The specification does not elaborate on the invention in a clear manner and hence renders it incapable of being carried out by a person skilled in the art.
- The claims are not clear or extend beyond the scope of the disclosures contained in the complete specification that was originally filed.
- The complete specification describes an invention other than that described in the provisional specification.
- Such other invention forms the subject of an application filed by the opponent where if a patent is granted would bear a date in the interval

between the date of an application and the leaving the complete specification

- Or if such an invention has been made available to the public by publication in any document in that interval

19. Opposition proceedings

The flowing flow chart shows the procedure of opposition:

- No further evidence shall be filed except with either the leave or the direction of the controller
- On the completion of evidence, the Controller shall give the parties a 30 day notice and fix a date for the hearing of the case.
- If either party desires to be heard, they shall notify the Controller within 10 days of the receipt of the notice on Form P-8(Annex.10)
- A request for the sealing of the patent by the seal of the Patent Office shall be made on Form P-10 (Annex.11) and the date on which the patent is sealed is entered on the Register.
- The patent shall be in the form given in the Fifth Schedule of the Patent Rules, 2003(Annex.12)

20. Duration of Patent

Once granted and sealed the duration of the patent is 20 years from the date of application.

21. Rights conferred by patent

The holder of a valid patent shall have the following rights:

- The owner of a product patent has the right to prevent third parties from the acts of making, using, offering for sale, selling or importing the product for these purposes.
- The owner of a valid process patent has the right to prevent third parties from the act of using the process and also from the acts of using, offering for sale, selling or importing for these purposes the product obtained from the use of the process.
- The owner of the patent reserves the right to assign, transfer by succession and to conclude licensing contracts with reference to the patent
- The owner of the patent has the right to institute court proceedings against any person who infringes the patent or performs any act that make it likely that the infringement will occur.
- The owner of an invention that relates to pharmaceutical or agricultural chemical product also had the right to file in an application for the grant of exclusive marketing rights of the product.

22. Loss or destruction of Patent

In the event of the loss or destruction of the patent, the owner of the patent must make an application in the prescribed manner (Annex13, Form 13) to the Controller and pay the prescribed who shall cause a duplicate of the original patent to be sealed and delivered to the applicant.

23. Infringement of Patent

The grant of the patent protects the patentable invention from the unauthorized making, using or selling for practical use or profit, during the life of the patent. Incase of any such infringement, the law allows the patentee to institute legal proceedings against the infringer and obtain a wide variety of reliefs (damages, injunctions, etc.) for the protection of his work.
